Catch My Drift

30 March 2019

Catch My Drift is an exhibition of new works by Brisbane artist Jason Binnie.

This exhibit of over 30 pieces, began its journey as a personal collection of driftwood, that developed and evolved as each unique item showed its natural expression of form and beauty to the artist.

Each sculpture is put together of nature's remnants, that many people walk past on the beach or river bank and simply dismiss.

The artist however saw wings, faces, expressions and fauna; which slowly came together, in the form of creatures of strength, death in nature, mythology, and joy.
