# Global Warming Painting, Black & White Drawings by Glenn Morgan

Opening

Friday 6 September 6pm ~ 9pm

Exhibition dates

3 September ~ 28 September 2013

“Glenn Morgan has presented us in this exhibition with a marvellous tableau of the human drama unfolding as aberrant climatic phenomena engage with the ancient land systems, which have been profoundly modified by settlement. This colourful living picture, nearly 10m long is complemented with a suite of monotone line and wash drawings, which are vignettes of moments of intimate personal experience. As with the grand panoramic narrative, the drawings resonate for us because of their openness, their unpretentiousness: thus their ring of truth.” ~ *Trevor Fuller, Place Gallery*
