We are Anangu living in the Anangu Pitjantjatjara Yankunytjatjara Lands.

In our country, we are all family right up from Indulkana to Pipalyatjara. For the longest time we have been living this way, as family on this land. Our families have always shared everything with each other. When we have no food, we could go to our family across the lands for food and water.

When we do paintings we are really happy to paint about the strong stories of our families and land.

This exhibition comes from four different art centres but really we are all family!
